

22% Protein Tub

PROTEIN SUPPLEMENT FOR BEEF CATTLE

Species: Beef

Type of Feed: Protein supplement

Form of Feed: 250lb lick tub

General Description: protein supplement for beef cattle

PROTEIN SUPPLEMENT FOR BEEF CATTLE

Guaranteed Analysis

Crude Protein	(not less than)	22.0%
Crude Fat	(not less than)	5.0%
Crude Fiber	(not more than)	4.0%
Calcium	(not more than)	0.20%
Phosphorus	(not more than)	0.50%
Potassium	(not less than)	3.0%
Vitamin A	(not less than)	20,000 IU/lb
Vitamin E	(not less than)	20 IU/lb

Ingredients:

Molasses Products, Corn Distillers Dried Grains with Solubles, Soybean Meal, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Soybean Oil, Silicon Dioxide, Ethoxyquin (a preservative up to 12.0%), Butylated Hydroxy anisole, (a preservative), Citric Acid (a preservative), Phosphoric Acid (a preservative).

Feeding Directions: Lick tub consumption will vary depending upon condition of the animals, quality and quantity of forages being fed, weather conditions, and the feeding location of the tubs. Cattle should consume 0.75 to 1.0 lbs. per head per day and fed at a rate of 1 tub per 25 head. Feed continuously along with plentiful amounts of high quality forage and an abundant supply of fresh water. Provide a separate source of vitamins, minerals and free choice salt during the first week of use. Place the tubs approximately 50-75 feet from loafing and/or watering areas. As livestock become acclimated to the presence of tubs repositioning may be necessary to achieve power consumption. Move tubs closer to increase, and further away to decrease consumption. Do NOT provide starved livestock free access to this tub. If over consumption occurs for more than two weeks, or for further directions consult your supplier or nutritionist.
