

PRO-LOCK[®]

STARTER FERTILIZER ENHANCER

Pro-Lock is a proprietary product designed for use with starter fertilizers to protect and enhance the nutritional components of starter fertilizers, especially in combination with AgPro.

Application
Method:

Use Rate: 46 oz/per acre

Why Pro-Lock?

- Stimulates seed germination
- Enhances root development
- Protects phosphorus availability
- Enhances uniform stand establishment
- Works with any starter blend, especially AgPro

START
AGPRO
STARTER FERTILIZER

Low-salt, seed safe starter
Improve emergence

+

ENHANCE

PRO-LOCK[®]
STARTER FERTILIZER ENHANCER

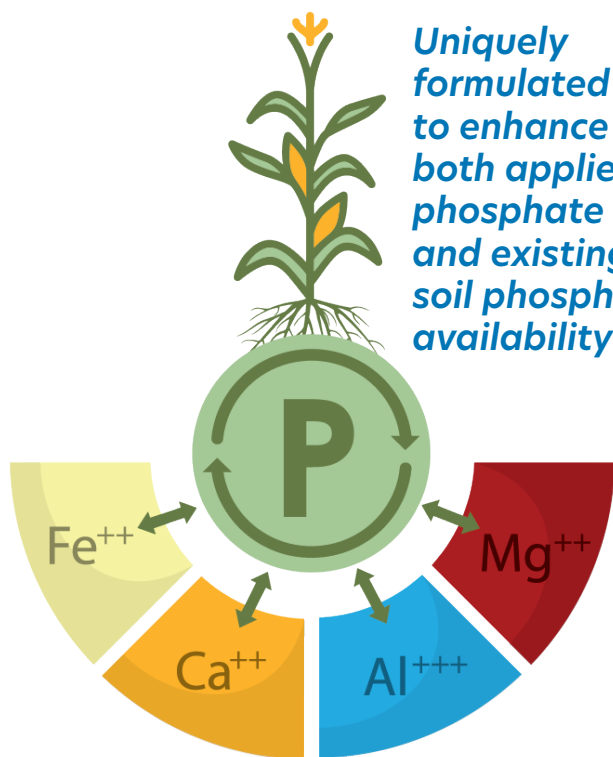

Increases P availability
Stimulate root growth &
microbial activity

+

GENERATE

BIOLOGICAL STIMULANT
Radson[®]

Custom blend of bacteria that
colonize plant roots
Solubilize minerals for season
long nutrient-use-efficiency

Uniquely
formulated
to enhance
both applied
phosphate
and existing
soil phosphate
availability
