

# AURORA BEAN STARTER™

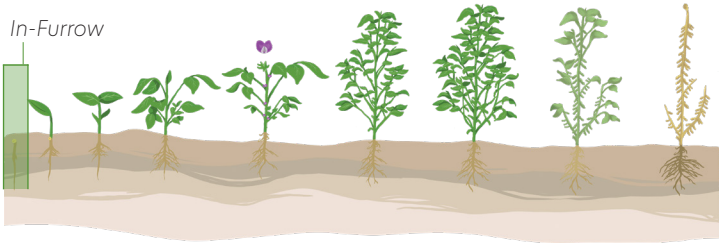

Aurora Bean Starter is designed to enhance early plant health leading to a vigorous, more uniform stand. It also is formulated to increase nodulation and root mass as well as it helps in the efficiency uptake of applied nutrients.

Application Method:

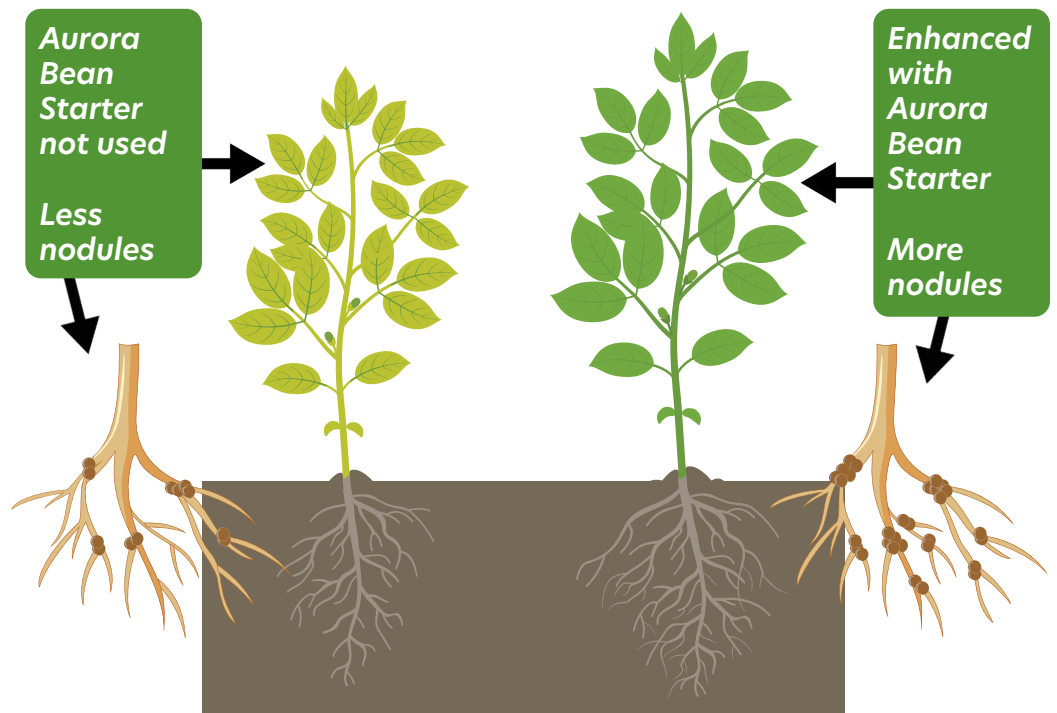

In-Furrow

**Use Rate:** 1 gal/acre

## Why ABS?

- Contains an ortho-ortho iron formulation to combat Iron Deficiency Chlorosis
- Combines a complete nutrient starter package for soybeans into one convenient product
- Stable formulation that requires no additional agitation
- Can be applied from at planting up to R1 stage of growth
