

BMO

BMO is designed to optimize crop growth by supplying boron and molybdenum which are both critical to enhance crop growth. BMO also includes an exclusive R2G additive that consistently improves nutrient uptake, which creates a greater ROI for the grower.

Application Method:

Use Rate: 1-2 qt/acre
Product Weight: 9.8 lbs/gal

Why BMO?

- A tool for improving plant health
- Excellent way to prevent or correct boron or molybdenum deficiencies
- Healthy plants undergo less stress, allowing them to reach their full yield potential
