

Hustle is a unique blend combining essential macro and micro nutrients and a proprietary blend of plant extracts to stimulate seed germination and to maximize early seedling growth and vigor. Hustle also includes a balanced ration of three hormones designed to work together to enhance seed germination and seedling establishment, provide stress reduction in cold soils, enhance cell elongation, and increase nutrient uptake for higher yield potentials.

Application Method:

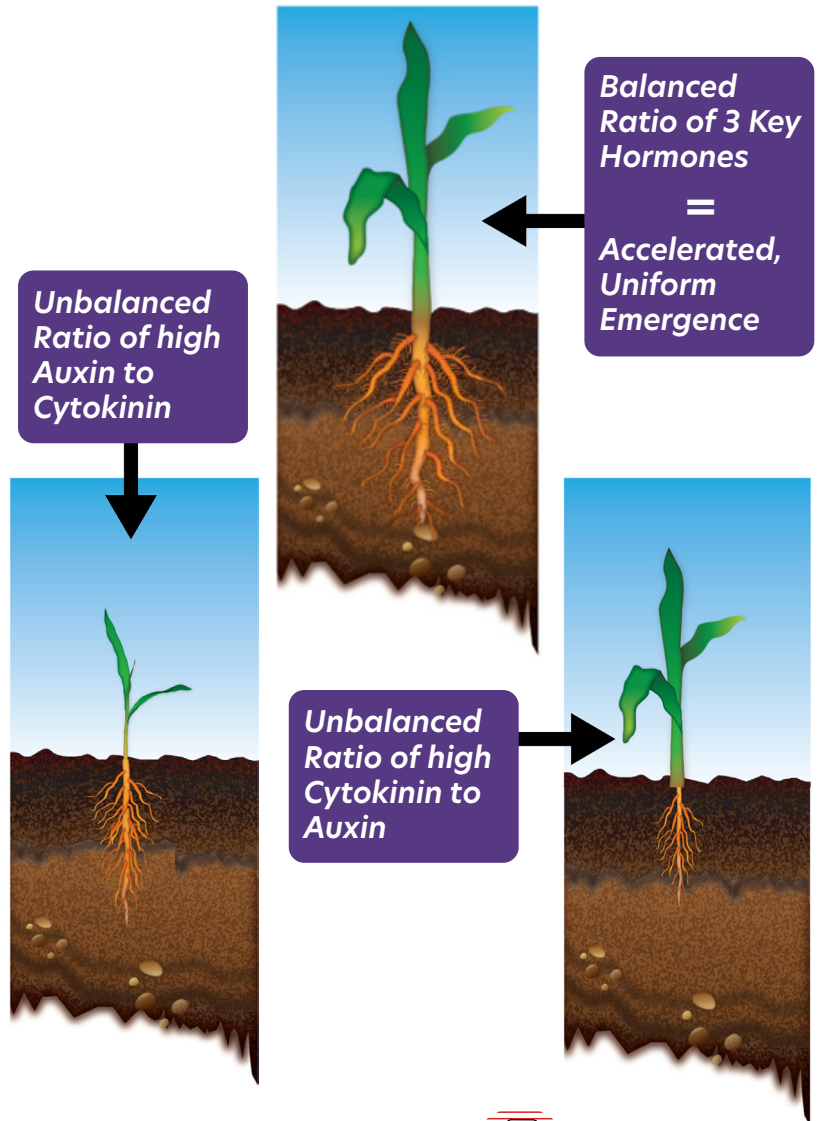

Use Rate: Corn - 2.4 oz/cwt
Soybeans - 1.2 oz/cwt

Why Hustle?

- Unique seed treatment offering multiple modes of action giving you a consistent emergence advantage
- Combined performance of proven components formulated into a convenient seed treatment
- Compatible with most other seed treatments and inoculants
- Every seed receives the same chemical message and same amount of food at the exact same time; producing the most even emergence possible
