

N-Shield Plus protects your nitrogen investment and allows the crop to get closer to its genetic yield potential. It is for all urea-based forms of nitrogen for above ground nitrogen protection, and UAN.

Application Method:  

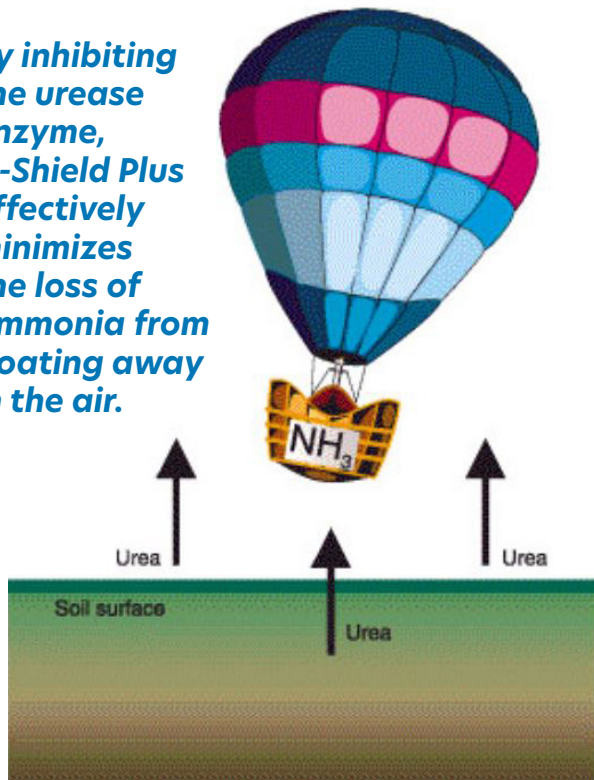

**Use Rate:** UAN: 2.06 pt/ton  
Urea: 2.06 qt/ton

## Why N-Shield Plus?

- Protects against volatility for up to 14 days (prior to tillage or rainfall)
- Inhibits urease enzyme, ammonia losses are minimized
- Unique solvent system, no offensive odor and safer to handle

By inhibiting the urease enzyme, N-Shield Plus effectively minimizes the loss of ammonia from floating away in the air.
