

Pivot Maxx is Aurora's **EXCLUSIVE** phosphate based fertilizer uniquely designed to be applied through center pivot irrigation as well as Y-drops without plugging or settling issues.

Y-Drop and late season applications

Application Method:

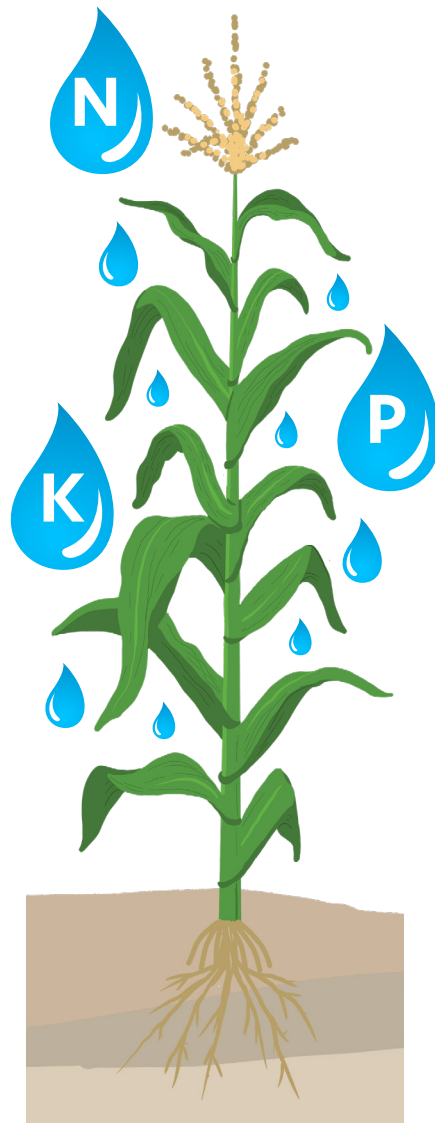

Use Rate: 4-10 GPA are common rates; multiple applications are best
Weight/Gal: 10.2 lbs

Why Pivot Maxx?

- Removes 79% of the precipitants which allows it to be used in any water source
- Correct analysis that matches up with late season crop needs (nitrogen, phosphate, and potassium)
- **Delivers late season nutrients that today's hybrids demand**

Nutrients Needed for 300 Bushel Corn			
Stage Sampled	Nutrient Uptake per Day (lbs)		
	N	P2O5	K2O
4-Leaf	.38	.08	.58
8-Leaf	1.63	.35	3.35
12-Leaf	3.43	.90	3.37
Early Tassel	11.05	2.85	15.32
Silk	1.43	.88	2.63
Blister	1.00	.70	.68
Early Dent	3.71	1.44	1.41
Mature	0.16	1.16	-1.65

NUTRITIONAL

Utilizing phosphate-based technology, Pivot Maxx offer a smooth and safe application process through the pivot, completely free of any blockage issues.
